PLSC S143

EVST S234

GLOBAL CLIMATE GOVERNANCE

On-campus

T/Th 9-12:15pm

This seminar provides an overview of global climate governance, including overarching conceptual frameworks, a variety of empirical subdomains, interlinkages with other policy fields, and central challenges encountered in global climate governance. Using a portfolio approach to examinations, students will prepare a range of individual and group assignments throughout the semester. Instructor: Detlef Sprinz, Ph.D.

Yale Summer Session welcomes applications from Yale College students, domestic and international college students or motivated high school students, and adults who are beyond their college years. Visit summer.yale.edu to learn more and apply.
